

PrimaryK	value	description	name	BMS 3.X	BMS 2.8	UNECE Rec21 korišteno u GlobeCatu	HR naziv	Ilustracija 1	Ilustracija 2
1	AA	A Rigid Intermediate Bulk Container (RIBC) that is attached to a pallet or has the pallet integrated into the RIBC. The container is used for the transport and storage of fluids and other bulk materials	Intermediate Bulk Container, rigid plastic	AA			srednji kontejner, kruta plastika	više se ne koristi	
2	AE	A gas-tight, pressure-resistant container with a valve and propellant. When the valve is opened, propellant forces the product from the container in a fine or coarse spray pattern or stream. (e.g., a spray can dispensing paint, furniture polish, etc. under pressure). It does not include atomizers, because atomizers do not rely on a pressurised container to propel product from the container.	Aerosol	AE			raspršivač (spray)		
3	AM	A relatively small container made from glass or plastic tubing, the end of which is drawn into a stem and closed by fusion after filling. The bottom may be flat, convex, or drawn out. An ampule is opened by breaking the stem.	Ampoule	AM	AMP		ampula		
4	BA	A cylindrical packaging whose bottom end is permanently fixed to the body and top end (head) is either removable or non-removable.	Barrel	BA	BBL	44 do 45	bačva		
5	BBG	Bag-In-Box or BIB is a type of container for the storage and transportation of liquids. It consists of a strong bladder, usually made of aluminium PET film or other plastics seated inside a corrugated fibreboard box. The box and internal bag can be fused together. In most cases there is nozzle or valve fixed to the bag. The nozzle can be connected easily to a dispensing installation or the valve allows for convenient dispensing.	Bag in Box	BBG	GBG		vrećica u kutiji		
6	BG	A preformed, flexible container, generally enclosed on all but one side, which forms an opening that may or may not be sealed after filling.	Bag	BG	BAG	62 do 64	vrećica		
7	BJ	A container, usually cylindrical, can be equipped with a lid and a handle. (e.g., a pail made of metal, plastic, or other appropriate material).	Bucket	BJ	BXT	51	kantica		

8	BK	A semi rigid container usually open at the top traditionally used for gathering, shipping and marketing agricultural products.	Basket	BK	BSK	27	košarica		
9	X11	Something used to bind, tie, or encircle the item or its packaging to secure and maintain unit integrity.	Banded package	X11	BDG		povezan paket		
10	BO	A container having a round neck of relatively smaller diameter than the body and an opening capable of holding a closure for retention of the contents. Specifically, a narrow-necked container as compared with a jar or wide-mouth container. The cross section of the bottle may be round, oval, square, oblong, or a combination of these. Bottles generally are made of glass or plastics, but can also be earthenware or metal. Bottle may be disposable, recyclable, returnable, or reusable.	Bottle	BO	BOT	32 do 33 42 do 43	boca		
11	BPG	A type of packaging in which the item is secured between a preformed (usually transparent plastic) dome or "bubble" and a paperboard surface or "carrier." Attachment may be by stapling, heat-sealing, gluing, or other means. In other instances, the blister folds over the product in clam-shell fashion to form an enclosing container. Blisters are most usually thermoformed from polyvinyl chloride however, almost any thermoplastic can be thermoformed into a blister.	Blister pack	BPG	BME		blister pakiranje		
12	BRI	A rectangular-shaped, stackable package designed primarily for liquids such as juice or milk	Brick	BRI	GBR		brick		
13	BX	A non-specific term used to refer to a rigid, three-dimensional container with closed faces that completely enclose its contents and may be made out of any material. Even though some boxes might be reused or become resealed they could also be disposable depending on the product hierarchy.	Box	BX	BOX	21 ili 25	kutija		

14	CG	A container enclosed on at least one side by a grating of wires or bars that lets in air and light.	Cage	CG	CAG	26			
15	CM	A flat package to which the product is hung or attached for display.	Card	CM	CG		podložak		
16	CMS	A one-piece container consisting of two halves joined by a hinge area which allows the structure to come together to close. Clamshells get their name from their appearance to the shell of a clam, which it resembles both in form and function.	Clam Shell	CMS					
17	CNG	A metallic and generally cylindrical container of unspecified size which can be used for items of consumer and institutional sizes.	Can	CNG	CAN	32	limenka		
18	CR	A non-specific term usually referring to a rigid three-dimensional container with semi-closed faces that enclose its contents for shipment or storage. Crates could have an open or closed top and may have internal dividers. Even though some crates might be reused or become resealed they could also be disposable depending on the product hierarchy.	Crate	CR	CRT	24 do 25	kašeta		
19	CS	A non-specific term for a container designed to hold, house, and sheath or encase its content while protecting it during distribution, storage and/or exhibition. Cases are mostly intended to store and preserve its contents during the product's entire lifetime.	Case	CS	CAS	21 ili 25	kutija		
20	CT	A non-specific term for an open or re-closable container used mostly for perishable foods (e.g. eggs, or fruit).	Carton	CT	CTN	22 do 24	karton		
21	CU	A flat-bottomed container that has a base of any shape and which may or not be closed with a lid. Usually made of paper, plastic or other materials these containers are typically used to contain mostly (but not exclusively) foods such as ice cream, margarine, yogurt, sour cream, confections, etc.	Cup\Tub	CU			šalica		

22	CY	A rigid cylindrical container with straight sides and circular ends of equal size.	Cylinder	CY	CYL	12	cilindar		
23	EN	A predominantly flat container of flexible material having only two faces, and joined at three edges to form an enclosure. The non-joined edge provides a filling opening, which may later be closed by a gummed or adhesive flap, heat seal, tie string, metal clasp, or other methods.	Envelope	EN	ENV	67	omotnica		
24	GTG	A rectangular-shaped, non-stackable package designed primarily for liquids such as juice or milk	Gable Top	GTG	GGT		tetrapak s čepom		
25	JG	A container, normally cylindrical, with a handle and/or a lid or spout for holding and pouring liquids	Jug	JG			vrč		
26	JR	A rigid container made of glass, stone, earthenware, plastic or other appropriate material with a large opening, which is used to store products, (e.g., jams, cosmetics).	Jar	JR	JAR	41	staklenka		
27	MPG	A bundle of products held together for ease of carriage by the consumer. A multipack is always a consumer unit.	Multipack	MPG	MPE		multipak		
28	NE	The item is provided without packaging.	Not packed	NE	UNP	0	nepakirano		
29	NT	A container of meshwork material made from threads or strips twisted or woven to form a regular pattern with spaces between the threads that is used for holding, carrying, trapping, or confining something.	Net	NT	GNT	66	mreža		

30	PB	A three-dimensional container which either has a pallet platform permanently attached at its base or alternatively requires a platform for its handling and storage as due to its constitution it cannot be handled without it. The characteristics of the platform should be specified using the pallet type code list	Pallet Box	PB	GPB		paleta-kutija		
31	PLP	A package used for sterile products which may be torn open without touching the product inside.	Peel Pack	PLP	GPP		Peel Pack		
32	PO	A preformed, flexible container, generally enclosed with a gusset seal at the bottom of the pack can be shaped/arranged to allow the pack to stand on shelf.	Pouch	PO			vrečica		
33	PT	A flat-bottomed container that has a base of any shape and which may or not be closed with a lid. Pots are usually made of cardboard, plastic, ceramic, metal or other materials and may be used for a wide array of products such as cosmetics, food/liquids, dairy products, plants.	Pot	PT			lonac	više se ne koristi	
34	PU	A shallow container, which may or may not have a cover, used for displaying or carrying items.	Tray	PU	TRY	27	tray		
35	PUG	Packaging of the product (or products) is currently not on the list. Use this code when no suitable options are available and only while a Change Request is approved for the proper packaging type.	Packed, unspecified	PUG	GPU		pakirano nespecificirano	čekamo sttus	
36	PX	A platform used to hold or transport unit loads.	Pallet	PX	PLT		paleta		
37	RK	A non specific term identifying a framework or stand for carrying, holding, or storing items. Commonly on wheels and primarily used in the logistical functions to deliver items such as hanging garments, or items on shelves such as dairy products and bakery items and flowers.	Rack	RK	RCK		vješalica		

38	RL	A spool on which thread, wire, film, etc., is wound. Any device on which a material may be wound. Usually has flanged ends and is used for shipping or processing purposes.	Reel	RL	REL	91	rola		
39	STR	In packaging, a high-tensile plastic film, stretched and wrapped repeatedly around an item or group of items to secure and maintain unit integrity. The use of stretch film to tightly wrap a package or a unit load in order to bind, protect and immobilize it for further handling or shipping.	Stretchwrapped	STR	STW		stretch folija		
40	SW	In packaging, a plastic film around an item or group of items which is heated causing the film to shrink, securing the unit integrity. The use of shrunken film to tightly wrap a package or a unit load in order to bind, protect and immobilize it for further handling or shipping.	Shrinkwrapped	SW	SRW	67	termofolija		
41	SY	A non-rigid container usually made of paper, cardboard or plastic, that is open-ended and is slid over the contents for protection or presentation.	Sleeve	SY	SLV		Navlaka		
42	TU	A cylindrical container sealed on one end that could be closed with a cap or dispenser on the other end.	Tube	TU	TBE	11	tuba		
43	WRP	The process of enclosing all or part of an item with layers of flexible wrapping material (e.g., for an individually packed ice cream). Does not include items which are shrink-wrapped or vacuum-packed.	Wrapper	WRP	WRP		omotač		
44	ZU	A non-rigid container used for transport and storage of fluids and other bulk materials. The construction of the IBC container and the materials used are chosen depending on the application.	Flexible Intermediate Bulk Container	ZU			fleksibilni srednji kontejner		

45	VP	Packaging from which substantially all gases have been removed prior to final sealing.	Vacuum-packed	VP			vakuumirano
